About MBRIF

The Mohammed Bin Rashid Innovation Fund (MBRIF) is a federal initiative launched by the UAE Ministry of Finance (MoF). The initiative seeks to identify and nurture high-potential innovations both within the UAE and abroad. It aims to enhance the growth potential of businesses and shape the future of the UAE's economy.

MBRIF focuses on the seven sectors outlined in the UAE National Innovation Strategy: Space, Transport, Education, Technology, Water, Clean Energy, and Health.

Please see below for more information on the members presenting.

AkelTech

Book a Meeting

"Please make sure when booking a meeting to include the startup or founder name in the subject"

VALUE PROPOSITION

Akeltech is a fully integrated smart food platform delivering fresh, high-quality meals anywhere, anytime through AI-powered vending systems combining in-house food production, proprietary machine manufacturing, and intelligent operations.

- Eliminates labor dependency and operational complexity through automated, end-to-end food retail infrastructure.
- Ensures consistent quality and cost efficiency by controlling the entire value chain—from production to point-of-sale.
- Enables partners to deploy scalable, 24/7 food outlets in minimal space with zero on-ground management.

PROBLEM

Access to fresh, affordable meals is constrained by inefficient food service models that depend on high labor, complex logistics, and limited availability, resulting in higher costs and poor scalability.

SOLUTION

A network of smart vending machines delivering fresh, hot, and cold meals, powered by a vertically integrated system combining hardware, software, and food production to ensure efficiency, consistency, and cost optimization.

TRACTION

\$70,000

MONTHLY REVENUE

130,00

FOODS SOLD

15%

16

MACHINES SOLD

BUSINESS MODEL

- Design and manufacture proprietary vending machines, deployed and operated directly by Akeltech using its own central kitchen (full-stack, vertically integrated model)
- Generate revenue from direct food sales through company-operated machines in high-traffic locations
- Sell machines to partners under a licensing model, enabling them to operate using Akeltech's system
- Earn recurring revenue through software subscriptions, maintenance contracts, and ongoing technical support

Bellboy

Book a Meeting

"Please make sure when booking a meeting to include the startup or founder name in the subject"

VALUE PROPOSITION

Bellboy is a voice AI platform that enhances the hospitality experience by automating guest interactions and bookings through 24/7 multilingual support.

- Provides 24/7 voice-based guest support in 60+ languages, improving accessibility and guest experience
- Automates booking and inquiry handling, reducing reliance on front-desk staff and lowering operational costs
- Seamlessly integrates with existing hotel management systems, enabling quick adoption without disrupting operations
- Enhances operational efficiency by handling high volumes of guest requests in real time

PROBLEM

Hospitality operations remain heavily reliant on manual, staff-dependent processes, limiting the ability to provide consistent support, resulting in missed bookings, increased operational costs, and inconsistent guest experiences

SOLUTION

Bellboy provides a voice AI platform that automates guest interactions and bookings through 24/7 multilingual support, enabling hotels to deliver consistent service, reduce operational costs, and scale guest engagement.

BIOTWIN

[Book a Meeting](#)

"Please make sure when booking a meeting to include the startup or founder name in the subject"

VALUE PROPOSITION

BioTwin is a patient-centric virtual twin platform that builds a longitudinal biological profile for each patient using dried blood spot sampling and untargeted metabolomics -- enabling early detection, continuous monitoring, and multi-condition clinical decision support.

- Reduces diagnostic uncertainty through a provenance-auditable decision-support layer in clinical workflows.
- Empowers individuals through TwinMe, a personal virtual twin that monitors biological changes longitudinally and flags early warning signals across 15 conditions
- Connects patients and providers on a shared data layer, driving faster decisions and better outcomes.

PROBLEM

Today's healthcare system is built to react, not predict. Diseases are often identified at late stages, driving costs up by 3 to 6 times, while up to 20% of high-risk patients go undetected

SOLUTION

Biotwin integrates biological and clinical data to create dynamic digital twins that continuously monitor patient health, detect early changes, and generate predictive, actionable insights for clinician

CapQuest

Book a Meeting

"Please make sure when booking a meeting to include the startup or founder name in the subject"

VALUE PROPOSITION

CapQuest helps startups manage ownership with clarity and confidence, giving you a single source of truth for equity, real-time insights for smarter fundraising decisions, and full transparency across all stakeholders.

- Streamlines cap table management, equity allocation, and convertible tracking, providing a single source of truth for all ownership matters.
- Empowers founders with real-time insights and scenario modeling to manage dilution, support fundraising, and make informed decisions.

PROBLEM

Managing equity is often complex, time-consuming, and opaque; employees rarely understand share value, and founders struggle with cap table accuracy.

SOLUTION

CapQuest provides a centralized platform that simplifies cap table management, tracks all ownership elements in one place, and delivers real-time insights to support smarter fundraising and equity decisions.

Defy

[Book a Meeting](#)

"Please make sure when booking a meeting to include the startup or founder name in the subject"

VALUE PROPOSITION

Defy delivers an AI-native compliance platform that enables banks, financial institutions and digital asset businesses to manage risk, AML, and regulatory operations more intelligently and efficiently.

- Without replacing existing systems, Defy makes compliance and risk operations more automated, accurate, and scalable.
- It automates monitoring and investigations, reducing manual work and false positives while speeding up responses to financial crime.
- From AML to Travel Rule, Defy turns fragmented processes into a faster, more scalable operation.

PROBLEM

Rising AML, KYT, and Travel Rule requirements make digital asset compliance complex and costly, leading to fragmented operations, inefficiencies, high false positives, and increased regulatory and financial crime risk.

SOLUTION

An AI-native compliance platform that automates AML, monitoring, and investigation workflows to reduce false positives, lower manual workload, and enable faster, more accurate compliance decisions.

Digitech Oasis

[Book a Meeting](#)

"Please make sure when booking a meeting to include the startup or founder name in the subject"

VALUE PROPOSITION

Digitech Oasis delivers autonomous robotics and AI solutions that automate internal logistics, helping manufacturers and warehouses move goods with greater precision, efficiency, and lower-cost materials. Its platform enhances accuracy, minimizes downtime, and reduces operational costs

- The system combines fleet-level intelligence, real-time navigation, and autonomous energy management.
- Delivers 97.7% navigational accuracy, reducing mispicks and errors.
- It ensures no operational downtime and cuts energy costs by up to 57% compared to traditional methods.

PROBLEM

Manufacturers and warehouses face inefficient and error-prone internal logistics operations due to reliance on manual workflows, limited real-time visibility, and rising labor and energy costs.

SOLUTION

A fleet of autonomous mobile robots powered by AI that streamline material movement and workflow operations, reducing errors, eliminating downtime, and optimizing energy consumption across industrial environments.

Disrupt-X

[Book a Meeting](#)

"Please make sure when booking a meeting to include the startup or founder name in the subject"

VALUE PROPOSITION

Disrupt-X is an AI-driven platform that transforms buildings into intelligent, revenue-generating assets by centralizing property and facilities operations.

- Unifies asset management, maintenance, digital twins, IoT monitoring, and workforce tracking through ALEF 360°, enabling optimized performance and reduced downtime.
- Enhances operational efficiency, lowers maintenance costs, and improves tenant experience through data-driven insights and automation.

PROBLEM

Commercial real estate and facility operations are highly fragmented, relying on disconnected systems and manual processes that limit visibility, reduce efficiency, and increase operational costs.

SOLUTION

Disrupt-X provides a unified AI- and IoT-powered platform (ALEF 360°) that connects assets, automates operations, and delivers real-time insights to optimize building management and decision-making

Neulink

Book a Meeting

"Please make sure when booking a meeting to include the startup or founder name in the subject"

VALUE PROPOSITION

Neulink is an AI-powered platform that enables pharmacies to streamline operations by integrating inventory management and insurance claims processing into a single, unified system.

- Reduces operational costs by up to 40% through automation of inventory and claims workflows
- Achieves up to 99.8% inventory accuracy, minimizing stock discrepancies and improving supply management
- Cuts medication errors by up to 95%, enhancing patient safety and compliance
- Processes insurance claims up to 5x faster, improving cash flow and operational efficiency
- Eliminates fragmented systems by providing a unified platform for pharmacy operation

PROBLEM

Pharmacy operations remain fragmented and largely manual, resulting in inventory inefficiencies, increased waste, and slow insurance claim approvals.

SOLUTION

Neulink provides an AI-powered, end-to-end platform that automates supply chain management, demand planning, and insurance claims processing, enabling pharmacies to operate more efficiently, accurately, and at scale.

Palmear

Book a Meeting

"Please make sure when booking a meeting to include the startup or founder name in the subject"

VALUE PROPOSITION

Palmear is a patented pest detection technology that uses bioacoustic AI to detect hidden vibrations in biological systems – such as palm trees

- Identifies infestations with 90% accuracy, allowing rapid, targeted action while reducing pesticide use by 40%.
- Enhances agricultural productivity by increasing yields by 15% and delivering real-time tree health insights

PROBLEM

Today, farmers walk row by row, manually checking each tree by eye or tapping the trunk, It takes weeks, misses early-stage infestations, This costs farms \$63,000+ in damages on average

SOLUTION

Palmear solves this in 20 seconds by using its proprietary AI detection algorithm and acoustic sensors to detect pests in real time from inside crops

Pharmedic

Book a Meeting

"Please make sure when booking a meeting to include the startup or founder name in the subject"

VALUE PROPOSITION

Pharmedic is a precision health platform that uses AI and genomic insights to personalize treatments, reduce adverse drug reactions, and optimize patient outcomes

- Reduces adverse drug reactions (ADRs), prescription errors, and polypharmacy risks through AI-driven insights
- Addresses a critical gap in healthcare by shifting from standardized prescribing to individualized, data-driven care
- Supports patients and clinicians with localized, multilingual guidance across medications, supplements, and nutrition (available in 7 languages)

PROBLEM

Healthcare remains largely standardized, with a one-size-fits-all approach, despite significant differences in how patients metabolize medications, leading to adverse drug reactions, ineffective treatments, and increased healthcare costs.

SOLUTION

Pharmedic leverages AI and genomic insights to personalize treatment decisions, enabling safer prescriptions, reducing adverse drug reactions, and optimizing patient outcomes across medications, supplements, and nutrition.

Professional.me

Book a Meeting

"Please make sure when booking a meeting to include the startup or founder name in the subject"

VALUE PROPOSITION

Professional.me is AI infrastructure for talent intelligence, helping organizations understand who thrives where and why — powering smarter decisions across hiring, retention, succession planning, internal mobility, learning and development, and workforce optimization.

- At its core is MEG, an AI assistant inside WhatsApp, Slack, and Microsoft Teams, using micro-LLM technology to evaluate capability rather than match keywords.
- It integrates with 40+ ATS and HRIS systems as an intelligence layer, enhancing the tools organizations already use.

PROBLEM

Talent decisions are often based on incomplete or outdated data. Organizations lack a unified view of internal skills and rely on fragmented hiring data, leading to mis-hires, attrition, leadership gaps, and overlooked talent. The root cause is poor data.

SOLUTION

Professional.me turns talent data into a single intelligence layer using 40+ HR, ATS, and PMS integrations. It delivers insights on hiring, attrition risk, leadership, internal mobility, and restructuring via MEG on WhatsApp, Slack, and Teams.

"Please make sure when booking a meeting to include the startup or founder name in the subject"

VALUE PROPOSITION

Qode provides a single unified platform that enables venues to carry out an end-to-end digital enablement of their business; from Customer Experience, back of house operations and data driven insights.

- Provides digital transformation tools that reduce costs and boost operational efficiency.
- Maximizes facility utilization and guest retention through real-time visibility.
- Offers tailored features for specialized markets instead of generic solutions.
- Uses data-driven analytics to monitor performance and track usage trends.

PROBLEM

Sports and leisure venues rely on fragmented systems for bookings, CRM, and payments, leading to operational inefficiencies, manual processes, and lost revenue.

SLZ

Book a Meeting

"Please make sure when booking a meeting to include the startup or founder name in the subject"

VALUE PROPOSITION

SLZ develops AI-powered digital twin and AR/XR solutions that automate complex MEP design and construction workflows. Its technology significantly reduces design time and rework while enabling real-time, data-driven coordination across project teams.

- AI-powered automated MEP route planning cuts design time
- AR/XR collaboration improves communication and reduces site visits
- Reduces rework costs by up to 30% and engineering hours by 80%

PROBLEM

MEP (Mechanical, Electrical, and Plumbing) design remains a major bottleneck in construction, driven by manual workflows, limited site visibility, and fragmented coordination across teams.

SOLUTION

A platform that integrates digital twins and AR/XR to enable real-time, on-site design adjustments, improving coordination and resolving construction issues efficiently.

Synergy Quantum

Book a Meeting

"Please make sure when booking a meeting to include the startup or founder name in the subject"

VALUE PROPOSITION

Operating at the convergence of AI, quantum disruption, and digital sovereignty, it builds quantum-secure communications, post-quantum cryptography, and military-grade infrastructure to protect governments and critical industries.

- Its platform integrates discovery, cryptography, communications, and migration. The QCBOM maps risks and enables regulator-aligned pathways, positioning it with global leaders.
- It delivers TRL 9 technologies including secure communications, Quantum Secure VPNs, HSMs, secure chips, and 5G Core and O-RAN solutions.

PROBLEM

The rise of quantum computing has created the quantum threat, harvest now decrypt later has meant all data is at risk of being decrypted by adversaries

SOLUTION

Post-quantum cryptography (PQC) secures data against quantum threats, with PQC migration services helping institutions identify vulnerabilities and implement PQC to protect their digital infrastructure.

Terra Grow

Book a Meeting

"Please make sure when booking a meeting to include the startup or founder name in the subject"

VALUE PROPOSITION

Terra Grow offers AI-driven hydroponic systems that enable efficient, high-yield food production anywhere, reducing costs and improving sustainability.

- Terra Grow provides autonomous food infrastructure powered by Cognivue AI, combining IoT sensors and precision hydroponics to deliver fresh, high-yield produce anywhere from urban rooftops to large-scale farms.
- Modular snap-fit pods make it easy to deploy for homes, cafes, and large growers.
- Open API integration allows connection with solar and smart-grid systems for sustainable operations.

PROBLEM

Traditional agriculture relies on resource-intensive practices, long supply chains, and limited arable land, leading to inefficiencies, high costs, and inconsistent access to fresh produce.

SOLUTION

AI-powered, IoT-enabled hydroponic systems that enable autonomous, high-yield food production in any environment, using real-time data and precision controls to optimize growth conditions.

Third Body Dynamics

[Book a Meeting](#)

"Please make sure when booking a meeting to include the startup or founder name in the subject"

VALUE PROPOSITION

Third Body Dynamics develops modular, AI-powered satellite systems enabling faster and more accessible space missions.

- Delivers AI-native, plug-and-play satellites with onboard autonomy and EO analytics, reducing costs and accelerating deployment from years to weeks.
- Provides scalable intelligence-as-a-service supporting climate monitoring, infrastructure resilience, and security use cases across MENA.

PROBLEM

Over 60% of nations lack access to satellites this is because the space infrastructure is complex, expensive, and slow, with traditional satellite systems lacking flexibility, scalability, and rapid deployment capabilities.

SOLUTION

TBD (Third Body Dynamics) develops modular, AI-powered satellite systems that enable faster, more flexible, and cost-efficient access to space infrastructure for a wide range of missions.

Toothpick

Book a Meeting

"Please make sure when booking a meeting to include the startup or founder name in the subject"

VALUE PROPOSITION

Toothpick is the operating system for out-of-pocket healthcare, connecting clinics, distributors, and financial institutions into one unified platform.

- Powers healthcare transactions and operations by integrating procurement, financing, and clinic workflows into a single system.
- Improves cash flow and efficiency, distributors scale their reach, and patients gain better access to treatments.

PROBLEM

Healthcare relies on fragmented systems. Clinics use disconnected tools for payments, financing, and procurement, reducing efficiency, weakening cash flow, and limiting patient conversion.

SOLUTION

Toothpick is an integrated platform that unifies procurement, financing, and digital clinic operations, connecting clinics, distributors, and patients into one seamless, efficient ecosystem.
